

Look Up! Look Out!

Are you cleaning your eaves, trimming trees, or hanging decorations?

Look up and look out for overhead powerlines. Always carry your ladder and equipment horizontally and always stay at least three metres away from overhead lines.

Stay Safe This Autumn

Whether you're finishing your fall yard work, or keeping warm indoors, follow these safety tips to keep you and your family safe this autumn.

Use only weatherproof electrical devices for outside activities.

All outdoor outlets should be equipped with Ground Fault Circuit Interrupters (GFCI) and weatherproof covers.

If you have electrical work that needs to be done in your home, only hire a Licensed Electrical Contractor for the work.

Install tamper-resistant receptacles to protect younger children from shocks. They have special shutters that cover the plug slots and help prevent little fingers or objects from going into the outlet.
