

## Connect Properties Faster and More Effectively With Waterloo North Hydro

A safe connection to our electricity distribution system is one of the most important steps developers and contractors must complete.

See below for a list of important forms, information documents and services we offer to help you get your project up and running.

### Service Connection Process and Technical Documents

Find out what steps are involved in connecting your building to Waterloo North Hydro's electricity distribution system and understand the technical guidelines you need to follow when coordinating a new or upgraded electrical system at a property.

## Let Waterloo North Hydro be Your **Suite Metering** Provider

Waterloo North Hydro has more than a century of experience in the electricity industry. We're experts in billing, collections, metering, and customer support.

Choosing us as your suite metering provider comes with many benefits, including:

- No cost assessment, system design, supply, and installation of metering equipment.
- Transparent rates regulated by the Ontario Energy Board.
- Separate accounts created directly by Waterloo North Hydro for the suites.
- Access to paperless billing and energy consumption information through a free online portal.
- Turnkey service including full meter readings, billing and collection services.
- Ongoing maintenance of meters, including re-certification.
- Installation audit completed by an independent Measurement Canada accredited inspection agency.
